SUMMARY

Hello, my name is Duong. I have **4 years** of experience as a backend developer using **Python** and **AWS System**.

What defines me isn't how much I know, but how I approach problems — I love taking on challenges, learning continuously, and exploring things in a deep and thoughtful way.

I am good at designing and building backend systems. I care about clean code, security, and performance. I always try to improve my skills and support my team.
